# TCL Health Edition A New Generation of Air Conditioner

Pure Vitamin C Air | Remove Odors | Optimize Humidity | Enjoy Cleaner Air

**6**  
LAYERS  
PROTECTION  
**6-IN-1 HEALTH  
FILTER SYSTEM**

High Density Filter

Silver ion Filter

Anti-dust static Filter

Active Carbon Filter

Catechin Filter

Photocatalyst Filter

Vitamin C Filter

SIGNATURE FEATURE

## Vitamin C Filter — The World's Freshest Air

Most air conditioners simply cool the air. TCL's Vitamin C Filter actively releases antioxidant Vitamin C molecules into the airstream — reducing oxidative stress, refreshing the skin, and creating the crisp, clean feeling of natural outdoor air inside your room. No other AC brand in Bangladesh offers this.

 Exclusive to TCL Premium Health Series

## PURE VITAMIN C

AIR FOR SKIN REFRESH

-  Antioxidant Vitamin C release
-  Reduces oxidative stress
-  Skin-refreshing clean air

## 6-in-1 Health Filter System — 6 Layers of Protection in Every Breath

1

### Silver Ion Filter

Kills 99% of bacteria on contact — keeping the unit hygienic inside

2

### Anti-Dust Static Filter

Electrostatically traps fine dust, pollen, and airborne particles

3

### Active Carbon Filter

Absorbs odours, smoke, and harmful VOCs from cooking & traffic

4

### Catechin Filter

Natural green tea extract — antiviral, antifungal, and deodorising

5

### Photocatalyst Filter

Light-activated breakdown of bacteria, mould spores, and allergens

6

EXCLUSIVE

### Vitamin C Filter

Releases antioxidant Vitamin C into the room for skin-friendly, refreshing air

# Why Vitamin C Makes the Air You Breathe

*Feel Like a Walk Through a Citrus Garden*

## 01 Antioxidant Release

The filter continuously releases Vitamin C (ascorbic acid) molecules into the cooled airstream. These antioxidants neutralise free radicals — the same process that makes citrus air feel invigorating.

## 02 Skin Refresh & Hydration

Vitamin C in the air reduces oxidative stress on skin cells, helping maintain skin moisture and brightness. Particularly beneficial in air-conditioned environments where air tends to dry out skin.

## 03 Natural Outdoor Air Feel

The crisp, fresh sensation of outdoor air comes partly from natural antioxidants. TCL's Vitamin C Filter recreates that feeling inside your room — eliminating the 'stale AC air' effect.

## 04 Exclusive to Bangladesh

No other air conditioner brand in Bangladesh currently offers an integrated Vitamin C filter. This is TCL's exclusive signature technology — making the Premium Health Edition truly one of a kind.

# Why Vitamin C Air Matters

*in Bangladesh's Hot, Humid, Polluted Environment*

## AQI 150+

### High Air Pollution

Dhaka regularly records AQI above 150 — 'Unhealthy' level. TCL's 6-layer filtration including Vitamin C actively counters indoor pollution from outdoor sources.

## 80% RH

### Monsoon Humidity

Bangladesh's average indoor humidity during monsoon exceeds 80%. Vitamin C in the air combats oxidative stress caused by prolonged exposure to humid, stale air.

## Hours/day

### Skin Health in AC Rooms

Most Bangladeshis spend 8–12 hours daily in air-conditioned spaces. Conventional AC air dries and ages skin. TCL's Vitamin C Filter actively refreshes it instead.
